

UDC Interpretation	#14-01	
	Clarification of Electronic Message Signs in Form Districts	
	UDC Section: 50-27.7.A	Date of Interpretation: 1/22/14
Approved by:	Charles Froseth, Land Use Supervisor 	

BACKGROUND: The Unified Development Chapter of the City of Duluth Legislative Code (UDC) is the official body of rules and regulations to guide land use and development in the City of Duluth, Minnesota. UDC Sec. 50-10 *Interpretation* authorizes the land use supervisor to interpret the provisions of this Chapter.

The question was asked: what was the City's intent concerning electronic messages signs and their appropriate zoning districts.

CODE INFORMATION: The City adopted a new sign code on April 14, 2013. Revisions to the new sign code were made on June 14, 2013. The Planning Commission had discussed and voted on removing electronic message signs from form districts F1-F7, but leaving them in F8 and F9. That change did not make it into the final city code; that was an error and the intent was to not allow them in F1-F7.

UDC INTERPRETATION:

The City anticipates a technical correction to this provision will be part of the annual UDC amendment package in early 2014.

DISCLAIMER: While it is the intent of the administration to submit a technical correction to the city council consistent with this interpretation, the code can only be amended by city council action. This interpretation is not intended to be a promise or guarantee that the proposed amendment will be enacted.
